

# Crypto checkout for African businesses.

Accept stablecoin payments and settle locally with Clink,  
Clink gives you everything you need to build global payments.

Pay with clink 

CLINK

# We're like Stripe, but for USDC payments.

Integrate a checkout directly into your app with a simple SDK.

Accept stablecoins like USDC from customers anywhere in the world

Automatically convert incoming payments into local currency

Get paid directly into your bank account without extra steps.

# Money is already global.

Stablecoins like USD Coin are already used worldwide.

People across Africa receive and hold digital dollars daily.

Cross-border value transfer is now fast and accessible.

But most of this activity happens outside real business tools.

The money has changed. The systems haven't.

# Turn stablecoins into usable payments.

Millions already hold and transact with stablecoins.

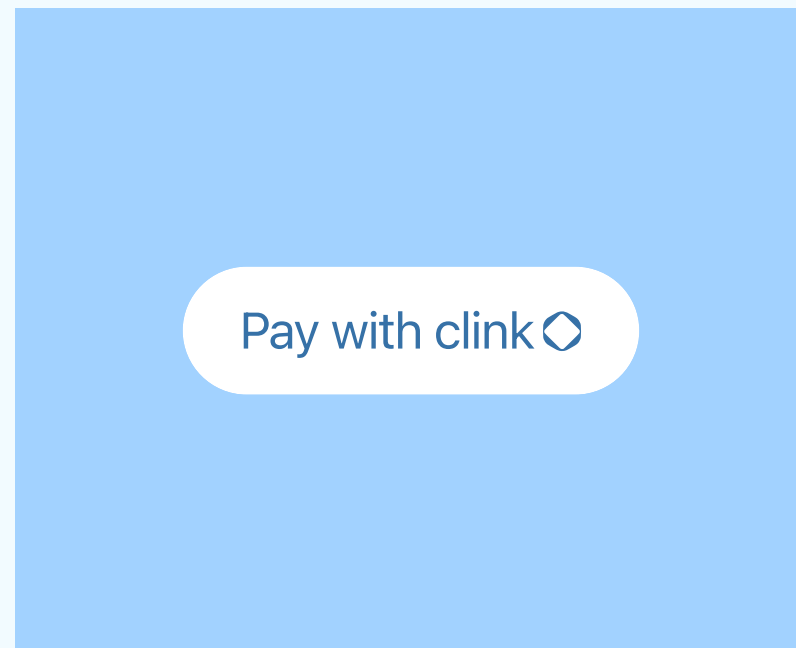

African businesses need better ways to accept global payments.

Developers want simple APIs, not blockchain complexity.

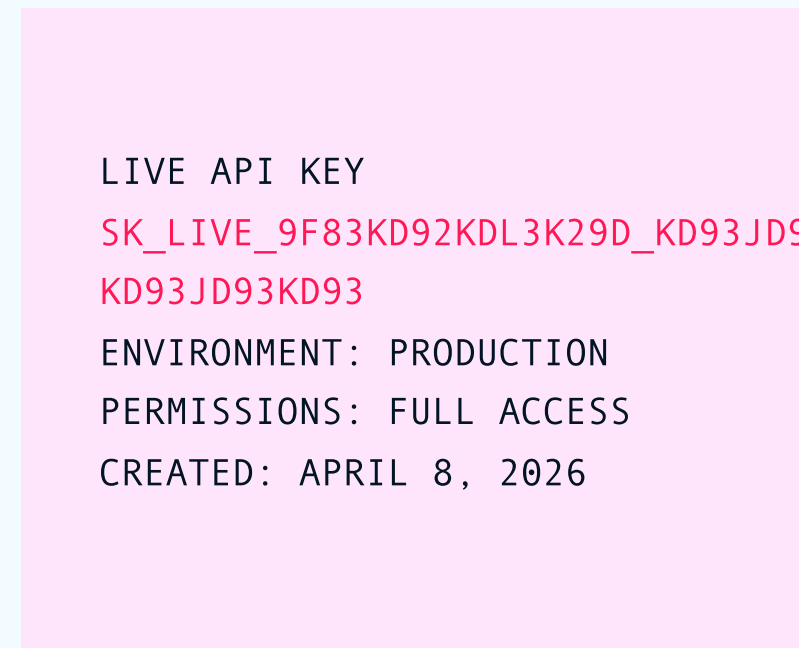

The first great checkout layer becomes the default

Global demand. Local limitations.

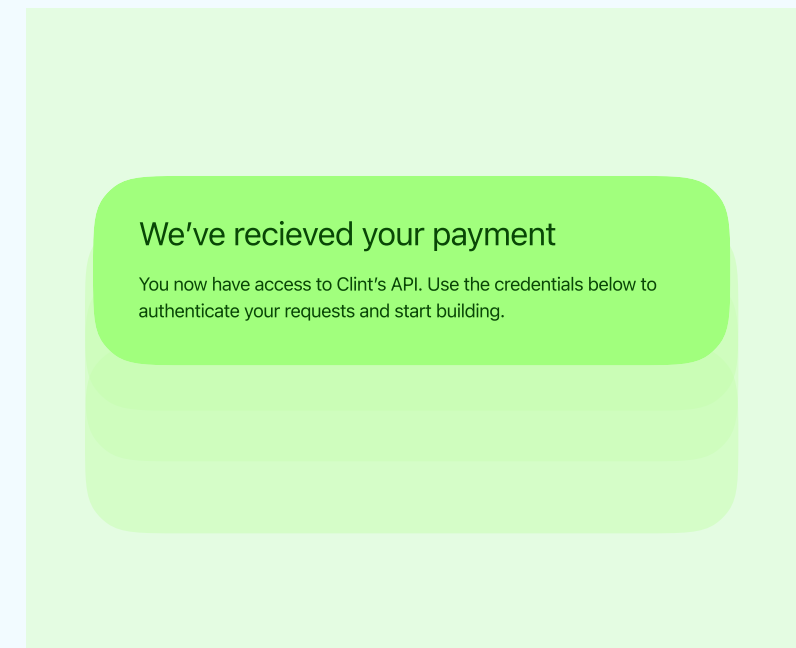

# Clink makes stablecoin payments simple.

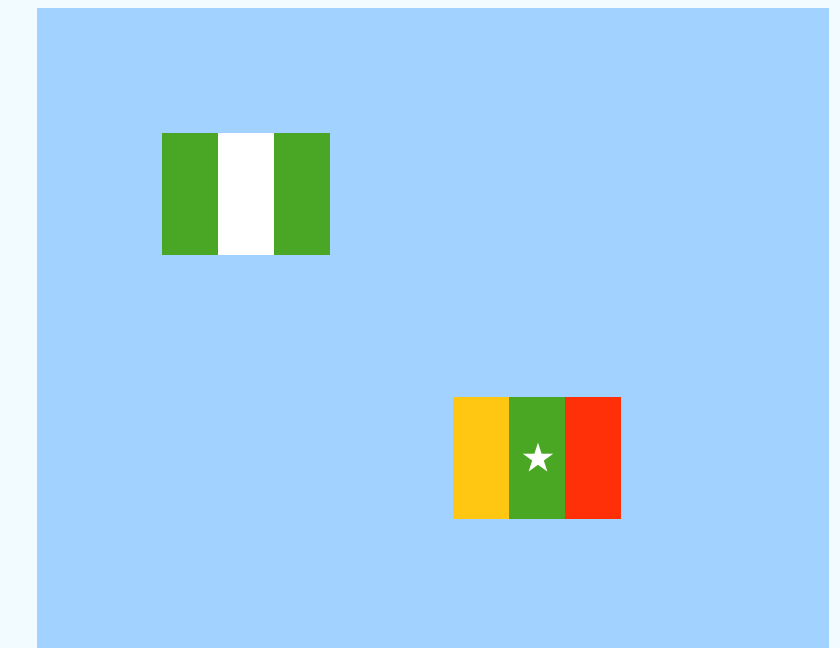

Drop-in checkout to accept USDC globally.

Simple API that abstracts blockchain complexity.

Real-time payment confirmation via Stellar.

Automatic conversion and payout into local currency

## Stablecoins, without the friction.

# A large and growing opportunity.

Stablecoin volume globally is in the hundreds of billions.

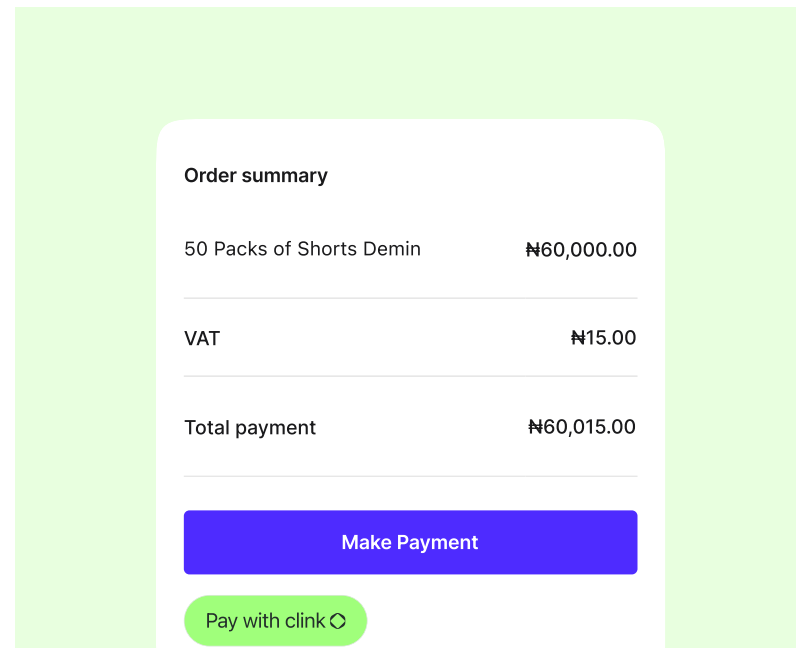

Africa is one of the fastest-growing crypto regions.

Cross-border payments in Africa are a multi-billion dollar market.

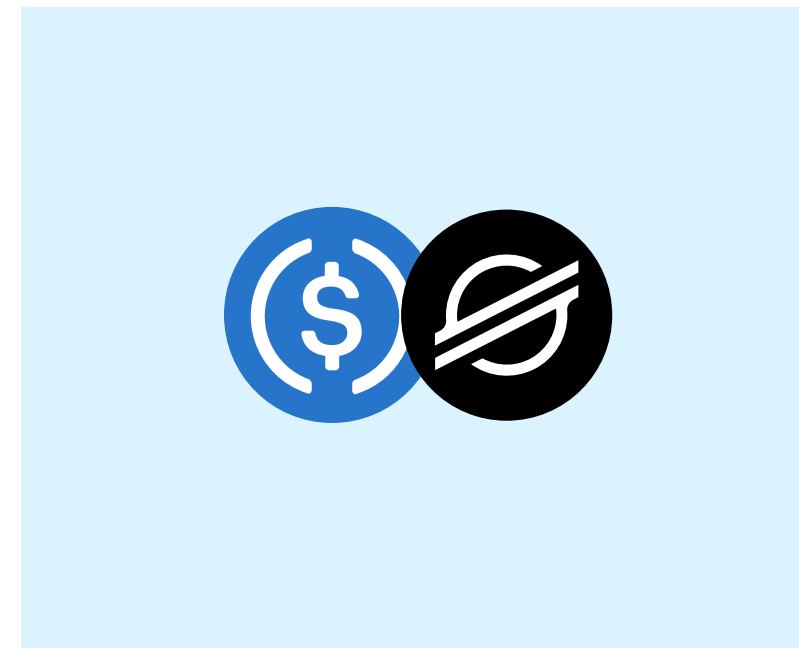

Even small fees at scale generate significant revenue.

Large market. Early stage.

# From USDC to local cash — in one flow

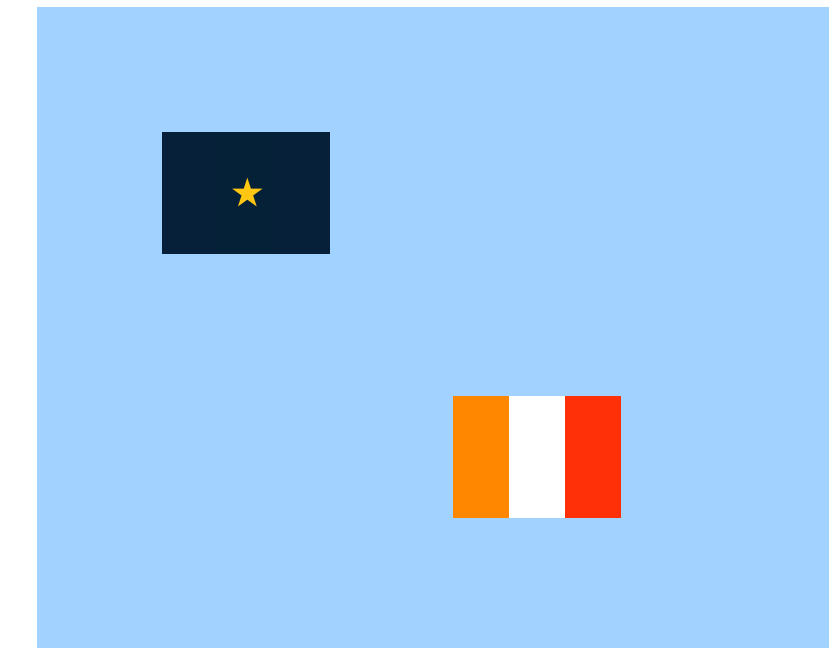

Developer integrates Clink SDK or uses hosted checkout.

Customer pays using USDC on Stellar

Clink verifies transactions instantly on-chain.

Funds are converted and settled into local bank accounts.

## USDC in. Local currency out.

# Simple, scalable monetization

0.5% – 1% fee on every transaction

Margin on conversion and payout flows.

Premium tools and analytics for merchants

Revenue scales with volume across markets

Revenue grows with usage.
